

```
#include<bits/stdc++.h>

using namespace std;

int main(){
    long long a;
    cin>>a ;
    long long b= sqrt(a);
    if(a==b*b){
        cout<<"YES"<< endl;
    }
    else{
        cout<<"NO"<< endl;
    }
    return 0;
}
```
